DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Drawings

2. The drawings are objected to because Figure 4 contains a number of reference characters that do not include lead lines. These lead lines need to be included in the figure. See 37 C.F.R. 1.84(q). Further, only Arabic or Roman numerals should be used for indicating the plane upon which a sectional view is taken. See 37 C.F.R. 1.84(h)(3). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The abstract of the disclosure is objected to because the abstract is too long. Correction is required. See MPEP § 608.01(b).
5. The disclosure is objected to because of the following informalities: On page 1, line 23, "leaner" should be --cleaner--.

Appropriate correction is required.

Allowable Subject Matter

6. Claims 1-12 are allowed.

7. The following is an examiner's statement of reasons for allowance: With respect to claim 1, the prior art does not disclose nor render obvious the claimed combination of subject matter, particularly a moving frame and a fixed frame formed to be cylindrical and fixed to the power brush and the supporting means in the power brush; and a two degree-of-freedom motor installed to correspond to the moving frame and the fixed frame, the two-degree-of-freedom motor for rotatively operating and linearly moving the power brush.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Doemling, Dorner et al., Sauers, Nishimura et al., Ahn et al., Japanese patents to Sakata et al., Nishimura et al., Fujita et al. and Imai et al. show the current state of the art of rollers driven by motors disposed inside.
